Candidate identity: Operator-technologist who turns ambiguous enterprise work into governed, observable AI-enabled operating mechanisms—strongest where workflow, engineering, human authority and adoption meet.

ROLE-ALIGNED CAPABILITIES

Forward deployed discovery · Agentic workflow architecture · Retrieval and context design · Human-in-the-loop authority · Evaluation and release evidence · Cloud-native operating concepts · Observability and cost discipline · Client workshops and code-with translation · Operating adoption

EXPERIENCE

Vape-Jet — Director of Operations

2025–Present

Leads AI-first operating transformation in a software-enabled robotics and machine-vision environment.

- Connects production, purchasing, quality, customer success, support, engineering issue flow, ERP/Odoo, Jira, HubSpot, Slack, telemetry and AI-assisted workflows into visible operating mechanisms.
- Uses factory, field, customer and machine-fleet signals from approximately 1,000 fielded robots to improve prioritization, risk detection, handoffs, dashboards, standard work, training and accountability.

DudeWorth — Founder / AI and Automation Advisor

2017–Present

- Develops AI-readiness and opportunity frameworks spanning value, feasibility, data readiness, governance, adoption burden, reuse and time-to-value.
- Designs agentic workflow patterns using structured context, retrieval, AI agents, human judgment, escalation, decision records, evaluation and governance rails.
- Advises on AI-enabled operations, logistics technology, warehouse automation, AMRs, ASRS, cobots, transportation systems, network analysis and workflow design.

Amazon — Operations Management / Site Leader

2014–2018

- Led launch and execution for Amazon Prime Pittsburgh in a 24/7 customer-backward environment supporting approximately five million second-day orders annually.
- Built leadership routines, labor planning, throughput visibility, escalation paths, standard work and Lean/Gemba operating mechanisms.
- Served on the Amazon Prime Now launch team with Whole Foods; contributed to logistics innovation through Prime Air research and Amazon Flex geolocation concepts.

Cardinal Building Products — Regional Director

2021–2023

- Built the company's first remote regional operation and modernized distributed CRM, commercial, fulfillment, logistics, digital marketing, SEO and online-buying workflows.
- Advanced AI-enhanced transportation-management and route-planning concepts.

EXPERIENCE CONTINUED

ZeusVu — Chief Pilot, Autonomous Systems & Aerial Data Operations

2018–2022

- Led regulated drone operations across medical, energy, logistics, real-estate and restricted-airspace contexts with a 100% safety record and no FAA incidents.
- Developed TensorFlow-based concepts for aerial inventory and computer-vision-enabled field intelligence; designed medical drone delivery and chain-of-custody concepts.

Compunetics — Director of Operations and Engineering Management

2000–2013

- Progressed through R&D program management, production management, strategic acquisition, operations management and director-level leadership.
- Led engineering, manufacturing, quality, customer delivery and complex technical programs in advanced electronics and high-reliability environments.
- Built quality systems, root-cause practices, performance measures and process controls; collaborated with DoD, CERN, Intel and AMD.
- Published industry articles, delivered technical talks and participated in the HyperTransport Consortium.

EDUCATION

University of Pittsburgh
Bachelor of Science
Academic grounding includes materials science, physical chemistry and biology-related studies.

[Google Scholar profile](#)

CREDENTIALS

Google AI Essentials
Food Safety Management Certification
IBM Enterprise Design Thinking Practitioner
Six Sigma Certification
OSHA 10

TECHNICAL TOOLKIT

Agentic AI · LLM workflows · RAG patterns · Human-in-the-loop design · Python · SQL · JavaScript · TensorFlow · Tableau · ERP/Odoo · Jira · Confluence · HubSpot · Slack · GIS and mapping workflows

Forward deployed contribution: direct workflow and agent design, client-to-engineering translation, production operating discipline, high-reliability controls, human authority, evaluation, observability and adoption mechanisms.
